

Mali - Gao Region - Gao

Gao is the Capital of the Gao region and located at the Niger River. The River builds a natural barrier to the expansion of the city to the West.

The Area of Gao South was chosen for this analysis because it is located in the west of the Airport which was important for delivering important goods and which was protected by the Mali military.

Gao was one of the most important destinations of IDPs in Mali, since it was considered a safe City protected from the conflict.

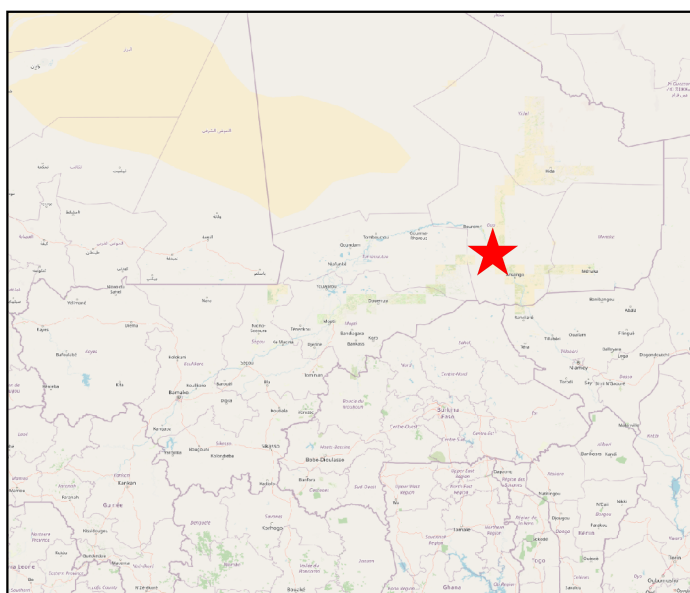

The majority of new settlements were created inside the protected fences of the airport.

The yellow layer shows new shelters in the period between 2018-12-13 and 2022-10-08.
